Anitra Nelson is an activist-scholar who applies interdisciplinary and action research approaches in a range of environmental, economic, political and social research interests. Honorary Associate Professor of RMIT University – affiliated with the RMIT Centre for Urban Research, active member of Cohousing Australia and Vice-President of the Australian New Zealand Society of Ecological Economics.

François Schneider, initially specialist of Life-cycle Assessment and Substance Flow Analysis, has promoted Degrowth since 2001. He co-founded Research & Degrowth (2006) (<http://degrowth.org/>) and co-organised seminars on housing for degrowth within the European Commission RESPONDER project. In 2012, he started the demonstration and experiential project Can Decreix (Cerbère, France).

Organizer: Wuppertal Institut für Klima, Umwelt, Energie gGmbH
